Clearing Control in Incoming Payments

During the processing of externally initiated payments, the system attempts in event 0110 to assign the payment amount to the open items. By default, the system posts unassigned amounts and partial amounts of a payment on account.

Clearing control takes account of entries in the same fields, as in [account maintenance](#). Additional postings, such as payments on account and expense and revenue postings, can also be set up.

♣ Example

A payment of 50- is received.
