Clearing Type

In Customizing for Contract Accounts Receivable and Payable, under ► **Open Item Management** ► **Clearing Control** ► **Define Clearing Types** ►, define the clearing rules, depending on the clearing type.

The **clearing type** represents the business transaction, such as payment lot (05), cash desk (19), or manual account maintenance (03). For the standard processes of incoming payments and account maintenance, the clearing type supplied by SAP corresponds to the origin (origin key of document HERKF_KK) of the clearing process.

The standard processes of Contract Accounts Receivable and Payable use the following clearing types:

Clearing Type	Description	Use
01	Manual posting	Incoming payment
03	Manual account maintenance	Account maintenance
04	Automatic account maintenance	Account maintenance
05	Payment lot	Incoming payment
06*	Payment run (Assignment of an available amount, for example, for incoming payment)	Payment run
19	Payment in the cash desk	Incoming payment
25	Check lot	Incoming payment
55	Credit card lot	Incoming payment

* Clearing type 06 is used in the configuration of the extended grouping in event 0600.

The system uses the following clearing types to distribute the clearing amount to the dependent items:

Clearing Type	Description	Use
20R	Distribute a payment to the original items of an installment plan	Distribute the clearing amount to the dependent items
20S	Distribute a payment to the original items of a collective bill	Distribute the clearing amount to the dependent items
30G	Distribute a payment to the line items of a summarization group	Distribute the clearing amount to the dependent items

i Note

A clearing type is also flagged if it controls the assignment of an available amount (such as a payment) to the open items. Otherwise, it only controls the assignment between the open items that have already been posted (account maintenance).

9/29/26, 9:57 AM

1. Filter the selected open items according to the specifications for restricting the selection
2. Creation of a clearing proposal based on the rules of the clearing variant
3. Handling of unassigned payments (on account or clarification)
4. Clearing statistical items without follow-on posting (indicator XCLON)
