Displaying and Changing Installment Plans

To view or change existing installment agreements for a business partner, proceed as follows:

1. In the SAP Easy Access screen, choose **Account** > **Installment Plan** > **Display** (transaction FPR3).
2. Choose **Change** or **Display**.
3. Specify the desired installment plan and choose **Continue**.

i Note

If you use the input help for the **Installment Plan Number** field, for selection using the installment plan history, the system displays only active installment plans as standard. If you also want to display deactivated installment plans, you have to specify a **deactivation reason** on the tab page **Installment Plan History**.

The following table lists the functions you can use when changing or displaying an installment plan:

Functions with Display and Change	Calling the function	Procedure / Notes
Print letter	Installment Plan > Save + Create Letter	The letter is written into the correspondence container. For more information on output, see Functions for Scheduling Program Runs , Printing Correspondence , and Printing Correspondence with the Print Workbench.
Display source receivables in the account balance display	Environment > Source Receivable (Account Display)	The system calls up the account balance display. You see the documents that were transferred to installment plan.
Display installment plan changes	Goto > Changes	
Display interest supplement	Environment > Interest Supplement	The precondition is that interest was charged on the installment plan.
Display / change processing locks	The system will display locks, such as payment, dunning, interest, and clearing locks, together for each installment plan item. When you place the cursor on the icon , the type of locks that exist are displayed in a quick info. For detailed information, such as the lock reason, double-click on the icon and select the required lock in the following dialog box. The overview also shows a column for each processing lock with the relevant lock reason. If there are several locks of the same type with different lock reasons, a tilde appears (~). By double-clicking on the table field with the lock required, you can display and change the details for this lock.	To set or change a lock, navigate using the icon  or by double-clicking on the corresponding table field in the overview to the dialog box for setting/changing the required lock and enter the data required. Alternatively, delete the lock reason or enter it in the required column in the overview. The field is only ready for input if only one unlimited lock exists or if there are none. In this way, you can only set time-based unlimited locks.

Functions only with Change	Calling the function	Procedure / Notes
Deactivate installment plan	►► Installment Plan ► Deactivate Installment Plan ►	If the installment plan has not yet been paid or has been partially paid, an automatic reversal of the interest and the charge document for this installment plan is possible.
Add installment	►► Edit ► Add Installment ►	If you add or delete installments, you must then ensure that the total of the installment plan corresponds to the amount of the source receivable.
Delete installment	Select the appropriate installment(s) and choose ►► Edit ► Delete Installment ►	If you add or delete installments, you must then ensure that the total of the installment plan corresponds to the amount of the source receivable.
Display source receivables in the installment plan history	►► Goto ► Display Source Receivables for Installment Plan ►	This brings you to the installment plan history. It will tell you which receivables are included in the installment plan. This function is also possible after the reactivation of the installment plan.
