Monitoring of Meter Reading Results

Use

To monitor meter reading results, you can use the following transactions in the **Utilities Industry** menu under **►Device Management ► Meter Reading ► Monitoring ►**.

Features

Monitoring of Meter Reading Results

Transaction EL31

You can use this transaction to monitor meter reading results based on different selection criteria. You have different monitoring options depending on the selection criteria you choose. The following table provides an overview of these options. The selection criteria are listed in the first column. The objects that you can monitor using these selection criteria are marked with x in each row.

	Lists			
Selection Criterion:	Schedule Record	Meter Reading Order	Meter Reading Result	Billing Order
Portion	x	x (*)	x (*)	x (*)
Meter Reading Unit	x	x (*)	x (*)	x (*)
Business Partner	-	x	x	x
Contract	-	x	x	x
Installation	-	x	x	x
Device	-	x	x	-
Premise	-	x	x	x

(*) At first the system displays a summarized list grouped by date (meter reading date, billing date); from here you can navigate to more detailed lists.

Portion or Meter Reading Unit

If you start by entering portions or meter reading units, you can display schedule records, billing orders, and meter reading orders.

If the business function **Utilities, Quantity Determination** (ISU_QD_1) is active, you can also display meter reading results.

Contract, Installation, Business Partner, or Premise

If you start by entering contracts, installations, or business partners, you can display billing orders, meter reading orders, or meter reading results.

Device

In almost all of the lists for the monitoring function, you can navigate to the detailed display of an object by choosing **Edit** or **Select** or by double clicking on the field in question.

Meter Reading Orders

If there are meter reading orders for the devices, you can use the pushbutton to navigate to the AMI monitor for one or more orders.

Meter Reading Results

The following functions are available in the lists of meter reading results:

- On-demand meter reading

For the right kind of devices, you can use the pushbutton to request on-demand meter readings.

i Note

A prerequisite is that you have activated the business function **Advanced Metering Infrastructure** (ISU_AMI_1).

- AMI monitoring

If there are meter readings for the devices, you can use the pushbutton to navigate to the AMI monitor for one or more meter readings.

i Note

A prerequisite is that you have activated the business function **Advanced Metering Infrastructure 2** (ISU_AMI_2).

- Quantity determination

For meter readings with a quantity determination trigger, you can use the pushbutton to carry out quantity determination.

i Note

A prerequisite is that you have activated the business function **Utilities, Quantity Determination** (ISU_QD_1).

Automatic Monitoring of Meter Reading Data

Transaction EL32

You can use this transaction to monitor meter reading data and trigger automatic follow-on processing for selected meter reading orders. For the follow-on processing actions, this transaction interprets the settings in Customizing for the automatic monitoring of meter reading data:

Customizing for **SAP Utilities** > **Device Management** > **Meter Reading** > **Basic Settings** > **Automatic Monitoring of Meter Reading Data**.

For more information about the automatic follow-on processing of meter reading orders, see the documentation for the Customizing activity.

Postprocessing of IDocs for Uploading Meter Reading Results

Transaction EL DM

9/29/26, 9:42 AM

Device Overview

Transaction EL43

You can use this transaction to get an overview of the devices of a meter reading unit.
